

Shubham Kumbhalkar, MBA, MS, Software Dev Engineer II

+1 312-687-0118 | shubham.kumbhalkar@gmail.com | [LinkedIn](#) | [Github](#) | [Blog](#) | [Profile](#)

Specialities

Dynamic Senior Software Engineer with 10+ years building and operating large-scale distributed systems. Currently at Amazon, I deliver high-impact solutions that process \$48B+ in annual revenue while maintaining 99.99% uptime. I combine deep system-design expertise (microservices, streaming/data pipelines) with hands-on Java and cloud engineering to drive reliability, scalability, and measurable business outcomes. Proven track record in technical leadership and cross-functional collaboration, optimizing engineering workflows, strengthening observability, and enabling teams to ship resilient features quickly and safely.

Technical Skills

Programming Languages: Java, Python, Rust, JavaScript, GraphQL, JPQL

AI Tools: Amazon Q, Claude Code, Kiro, Copilot, Wasabi, Langchain

Frameworks: Spring Boot, Hibernate, ReactJS, Spring Security

Databases: MySQL, Oracle, PostgreSQL, MongoDB, Cassandra

Cloud Technologies: AWS, S3, Terraform, CloudWatch, EKS, IAM

Tools: Jenkins, Maven, Splunk, Optimizely, Nginx, Macgyver, Kibana, OpsGenie

Messaging: Kafka, RabbitMQ, ActiveMQ, JMS, Zookeeper

Professional Experience

Amazon, Greater Seattle Area, WA

Jun 2024 – Present

Software Development Engineer II

- Delivered a scalable multi-unit ordering solution, reducing merchant costs by 40% and improving merchant retention
- Reduced inventory shrinkage by 45% through batch ingestion for ULT virtual receiving, cutting scan time by 32%
- Integrated merchant signals into demand forecasts, improving capacity allocation, saving \$0.02/unit in shipping costs
- Designed cold-start demand forecasting to enable capacity planning before historical fulfillment data was available
- Mentored 2 engineers on regional forecasting, improving planning reliability and cutting costs by 10%.
- Developed an AI-powered team chatbot consolidating runbooks, wikis, and on-call guidance to accelerate access to operational knowledge.
- Architected AWS CDK pipelines to scale third-party seller onboarding and audit management applications.
- Spearheaded Evaluation UI development, reducing CVE triage time by 20% and manual engagement by 15%.
- Improved CVE resolution SLA by 30% through automated severity, justification, and security dashboard tooling.
- Led Tier-1 service migration from MAWS to NAWS, maintaining full availability and improving platform reliability.
- Migrated 15+ services to versioned S3 buckets, preventing data loss and maintaining 99.99% service availability.
- Built a serverless anomaly detection pipeline with Lambda and CloudTrail, surfacing 10+ suspicious actions monthly.
- Leveraged Amazon Q for code generation and debugging, improving engineering efficiency across services.
- Developed a high-throughput system handling 500K req/sec across 5 external APIs, improved SLA adherence by 22%
- Implemented GenAI/NLP contract and document processing pipelines, reducing manual review effort by 30%.
- Reduced operational MTTD by 65% through CloudWatch alarms across 5 serverless applications.

LendingClub Corporation, San Francisco Bay Area, CA

Nov 2020 – Oct 2023

Senior Software Development Engineer

- Enhanced Auto Refinance product across 7 new states increasing loan listings by 15% and monthly revenue by 1.1M.
- Designed third-party tool integrations cutting manual input by 20% and boosting daily approvals by 150 applications.
- Implemented automated title verification reducing costs by 60% and process time by 50% for prime members.
- Served as Scrum Master for 11 engineers consistently, mentored teammates and conducted knowledge sharing.
- Drove A/B experimentation improving Auto Loan application submission rate by 20% and offer take rate by 12%.

Software Development Engineer

- Enhanced Auto Refinance platform across 7 new states increasing loan listings by 15%.
- Designed third-party integrations cutting manual input by 20% and boosting daily approvals.
- Implemented automated title verification reducing costs by 60% and process time by 50%.
- Served as Scrum Master for 11 engineers ensuring consistency and cross-functional alignment.
- Drove A/B experimentation improving Auto Loan application submission rate by 20%.

Harvest Savings and Wealth Technology Solutions, San Francisco, CA
2020

Aug 2019 – Nov

Software Engineer

- Developed Mock-Bank and API-Docs platforms improving sales and client onboarding efficiency.
- Conducted OWASP-ZAP penetration testing to secure all environments.
- Optimized API load handling with JMeter ensuring system scalability and reliability.

Techno Cronies Software Solutions, Nagpur, India

Jun 2016 – Jun 2017

Software Engineer

- Improved Java application performance by reducing response time by 20%.
- Directed technical team of two ensuring coding standards and timely delivery.
- Automated manual data loading saving 15 weekly labor hours.

Education

Humphreys University

Jun 2024

*Master of Business Administration in Information Technology***Illinois Institute of Technology**

May 2019

*Master of Science in Computer Science***St. Vincent Pallotti College of Engineering and Technology**

Jun 2016

*Bachelor of Engineering in Electronics and Telecommunications***Publications and Professional Achievements**

- Authored international paper: '[Wireless Audio Switching and Transmission System for Public Address](#)' (IJRET).
- Secured 2nd Prize presenting 'LI-FI: The Smart Internet' at national competition 'Explore 5.0' among 110 Applicants.
- Led Indian Society for Technical Education as Branch Head for 2 years driving events across multiple departments.
- Volunteered for the National Service Scheme contributing to Swachh Bharat Abhiyan to have clean cities.
- Recognized for leadership and mentorship initiatives promoting technical excellence by the Head of Department.
